EDUCATION

Purdue University, John Martinson Honors College

B.S. Robotics Engineering Technology

West Lafayette, IN

Expected May 2030

Phoenix Union Bioscience High School

Engineering-Focused Curriculum; GPA: 3.9 / 4.7

Phoenix, AZ

May 2026

TECHNICAL SKILLS

Programming: Java (WPILib), Python, C, JavaScript, HTML/CSS, SQL

Robotics & Controls: Control systems, autonomous systems, sensor integration, actuator control, embedded systems

Engineering: Autodesk Fusion 360, CAD, prototyping, electronics, wiring, 3D printing, welding, mechanical assembly

Tools: Git/GitHub, Linux, WPILib, VS Code

ENGINEERING EXPERIENCE

Phoenix Forge — GateWay Community College

Engineering Intern

Phoenix, AZ

Sept. 2025 – May 2026

- Designed and fabricated functional prototypes using metalworking, welding, woodworking, 3D printing, and rapid-prototyping workflows
- Developed hands-on experience with fabrication equipment, engineering shop processes, prototyping, and technical problem solving
- Supported makerspace members with equipment operation, fabrication workflows, troubleshooting, and shop safety procedures

FIRST Robotics Competition — Teams 11100, 2375 & 6833

Founder, President, Lead Programmer & Control Systems Lead

Phoenix, AZ

Sept. 2022 – Present

- Founded and led FRC Team 11100, recruiting 10+ students, establishing team operations, securing sponsorships, and directing engineering development
- Architected and programmed competition robot control systems in Java/WPILib, including autonomous and teleoperated operation, sensors, actuators, and subsystem integration
- Led control systems development across multiple competition robots and mentored teammates in programming, electrical integration, CAD, and engineering fundamentals
- Managed a \$5K+ robotics team budget, overseeing purchasing, expense tracking, and competition preparation

PROJECTS

Makers of Change — Southwest Human Development

Embedded Systems Engineering Finalist

Phoenix, AZ

Oct. 2025

- Developed an embedded control system for an assistive-technology prototype designed to improve accessibility for a child with disabilities
- Collaborated on a five-student engineering team and iterated the prototype based on testing and user requirements
- Selected as one of nine statewide finalist teams from 90+ teams across Arizona

AWARDS & CERTIFICATIONS

FIRST Dean's List Semi-Finalist (2024) | Autodesk Fusion Certified User

Arizona Engineering Technical Skills Assessment | IT Specialist Certifications: Java, Python, JavaScript, HTML & CSS
